Professional Summary

Software engineer with 7+ years of frontend development experience building scalable web and mobile applications. Experienced in developing modern products using React.js, Next.js, React Native, and Expo with a strong focus on performance, clean user experience, and maintainable architecture. Worked on real-world production applications including telehealth platforms, ERP and admission dashboards, and mobile-first systems with hands-on experience in deployment workflows, Docker, VPS hosting, and cloud platforms.

Work Experience

Lead Frontend Developer · Quickcoderz Apr 2019 - Present

Ludhiana, Punjab India · quickcoderz.com/

- Engineered a telehealth platform serving patients and healthcare providers with appointment scheduling, real-time video consultations, and digital medical records
- Architected modular frontend applications using React.js, React Native, and reusable component libraries, improving development velocity across multiple products
- Built enterprise ERP solutions handling CRM, quotation management, procurement, project tracking, payroll, and employee management using Laravel and React
- Integrated complex business workflows across frontend and backend systems, automating RFQ, quotation approval, invoice generation, and purchase order processes
- Improved application scalability through API optimization, reusable architecture, and efficient client-side state management
- Developed responsive e-commerce solutions using WooCommerce, custom WordPress development, and payment integrations for multiple business domains
- Created CMS-driven websites in Webflow and WordPress with SEO optimization, responsive layouts, and marketing-focused user experiences
- Worked in Agile teams, collaborating with designers, QA engineers, and backend developers to deliver high-quality production releases on schedule
